Contents:

CHAPTER 1

Installation:

1. Install the app
 - a) You can pip install it => pip install django-mapistration or b) You can install it by source
2. Add the app in your INSTALLED_APPS

```
INSTALLED_APPS = ( ... 'mapistration', )
```
3. Run syncdb

CHAPTER 2

How to Use Mapistration

Follow Installing Instructions First

CHAPTER 3

Template Changes

1. Add a div in your user registration template . Make sure it has a `id='map_canvas'`
2. Add `{% include 'maps' %}` . Make sure this include tag is below the div created above

CHAPTER 4

Form Changes

1. Make your Registration form inherit the LocationForm from the app

```
from mapistration.forms import LocationForm
```

```
class UserForm(LocationForm): full_name = forms.CharField(max_length=50) #example
```

CHAPTER 5

Model Changes

1) Link your registration model to mapistration Place Model You can use `OneToOneField` or `ForeignKey` according to your requiremnts.

```
from mapistration.models import Place
```

```
class UserRegistrationModel(models.Model): location = models.OneToOneField(Place)
```

CHAPTER 6

Indices and tables

- `genindex`
- `modindex`
- `search`
